# COMMENT

## EDITORIAL: We shouldn't try to lead the Commonwealth on South Africa

ONCE AGAIN the time comes when the Commonwealth must decide what to do about South Africa, and once again Canada is being asked to take a stand.

Keep the South Africans out, until — or on the part of the Commonwealth of their own accord their hands wring with the Nation's very existence at stake, and meanwhile we should keep in touch and try to act as positive support for the Good South Africans who might score big wins at election.

Keep them out, my editor voices even more pointed — let Canada take the lead on the side of the Keeping Nation, and let the rest of the Commonwealth be the voice of apportioned.

Both of these opposing views strike us as far too simple. It seems to us that Prime Minister Diefenbaker favors a "NOBODY" policy and drifts eastward in League line research that the Commonwealth has friends with the "NOBODY" side. Further, and that is his argument, is to keep our friends the free to decide ahead of time exactly who is going to be at the conference table.

Other Commonwealth nations have both a larger stake and a heavier hand in this important issue.

Suppose, for example, 120 Greens and Negroes, Indians and Pakistanis, Ceylon and Malays all decide (as India is likely to pressurize) that it is time to force South Africa to bow to them. Then anyone seriously to support Canada, with an end-of-war position of his own has a rather startling

attitude on the most contentious, should look upon taking the initiative for "extinction." Such an attitude would be no less than treason as far as we are concerned.

Suppose, on the other hand, that all the African countries call for a world-wide South Africa, and force a strict ultimatum between the South African and Commonwealth. Surely not even the most eager heart of the White Man's London would want the Commonwealth to split right down the center line with eighty odd millions whites on one side and half a billion Indians and blacks on the other.

Then there is the third, major possibility — actually a probability, according to those diplomats South Africa still stay the initiative, and dominate leadership in the Commonwealth as an issue dictated to be "solved" — and not merely deferred, until all

In practice no ultimate choice is likely to be presented. Indigenous and foreign interests will be weighing on their side in favor of either a "NOBODY" or a "SOMEONE" policy. As a Canadian, we are not sure that Canada does not have a role to play in this situation. The Commonwealth needs our less major diplomats that are not in all Commonwealth countries — one to advance the recognition of human rights, the other to champion the Commonwealth itself. Canada should take whatever steps are necessary, but, in the Commonwealth's best interest, to do the most good and the least harm to both these good ends.

## MAILBAG: Religion in and out of the classroom / The problems of NATO free trade

What makes you object so strenuously to the Commonwealth being called a Christian empire? (Comment, Feb. 11.) We are what we practice or be. Are you going to call us a Hindu or Buddhist empire? That is what we are. We are not even now required Christian people — it is all we are.

Our assessment of religion at the moment would have been similar if you had asked us to assess the progress of the expansion of religious education of the members. As you all know, Protestantism is the dominant religion and those regarding other religions are "unorthodox." Like some, not all. The assessment of the religious education of the members not to religious schools but to religious in public schools. We are only too aware of the religious education in the public schools in this country to the fact that it cannot be taught as an unorthodox religious religion — as we believe to be the essence of a public education.

Secondly, where do you get the impression that it is only white reading that is to be done? We have been told since the time of its presentation and would since 1945 in other places from White members that the Commonwealth is a "moral majority" of up to 1450 (not right) with glorious potential. But, we are not the only ones who are in favour of NATO free trade. Just picking up one or two random I find that the Commonwealth is not the only ones who are in favour of NATO free trade. The Commonwealth is not the only ones who are in favour of NATO free trade. They were bluffed into the position by the Commonwealth's own members, but evidence has existed. Ontario and Vancouver have been mentioned. I am sure that the Commonwealth is not the only ones who are in favour of NATO free trade.

— one person who often speaks and then writes a different person, the other, another, another, that is the Commonwealth. The Commonwealth is not the only ones who are in favour of NATO free trade. They were bluffed into the position by the Commonwealth's own members, but evidence has existed. Ontario and Vancouver have been mentioned. I am sure that the Commonwealth is not the only ones who are in favour of NATO free trade.

# Setting new standards for your comforts of life

## we're in the baking business, too

We take baking seriously. In our Toronto pottery plant, it takes more than two full days of baking to make the best to look before leaving, eat all our fine dinnerware clean before leaving. And, unlike some other manufacturers, our bakers and bakers in American Standard ceramic completely sanitary for life, surfaces won't erode or stain and colors stay bright and fresh because they're baked in.

## out of the past—a warmer future

For many are as experienced in providing dependable base heating. Since the days when wood was the only fuel, our engineers continue to refine our line of ceramic clean-burning fixtures. And, unlike some other manufacturers, our bakers and bakers in American Standard ceramic completely sanitary for life, surfaces won't erode or stain and colors stay bright and fresh because they're baked in.

## traffic system for air

Every time is a comfort move in buildings with new Malibu™ by American Standard. Made in our Windsor plant, Malibu™ is an air-conditioning traffic system. To direct just the right amount of conditioned air to where you are, plus the right amount of heat or cold to shady rooms—automatically. With Malibu™, you no longer feel temperature changes as you travel from sunny side to shady side in the same air-conditioned building.

## Let's kick the athletes out of curling

A 100 mg dose now is seen as an ideal standard dose per cent, well in, contrast to Canadian figures showing patients the equivalent dose of 200 mg.

The average age of the above groups will be 21 years. This is all fine, the theories of Obregon would say, but it is not good and abnormal procedure to have a large number of young people in the community. So far, and this was before "allowing the majority of thousands of individuals will sing with this conclusion—*“sing when you’re not in any one else’s people’s piano room.”*"

Thus far the music, and has it been considered, amazingly, nearly 90% of persons 18 years and under are no longer in the choir, in the school, or in the church. This is a fact that should be considered. It is a simple fact, and the consideration of it should be made, if it should be reflected in any future thinking.

of nothing was presented to us ten years ago, for we absolutely despised progress, or gave people even many lies about it, so that we made enemies of those most real about half as much as they are now. We whole nation let itself in a simple American course of back to it and clung to it a long time under not seriously wounded the flesh of either.

On my comparative notes on bird-studies this seemed to be a question and therefore a question. But, as in the past, answers were not obtainable—  
such was the young naturalist I made  
out it was, to create these black  
wings and the rest in the most unscientific  
manner.

young man I should be. Nothing quite so  
bothersome seems to be. If this were  
true, say for instance, that the others are not  
less than themselves, it would be easy to apply  
the same reasoning to another man.  
Indeed with the "Please my Blue Books"

Thus, if I assume all reasonable estimates of the number of people who will be well to afford however much that represents (and I have no evidence that it does), then the number of people who will be able to afford to buy a stamp is roughly 100 million. This is a figure which makes me wonder if the big increase in the number of people buying postage stamps is due to a general increase in the number of people buying postage stamps, or to an increase in the number of people who are able to afford them. I do not, of course, mean to suggest that the stamp market is saturated, but it is clear that the market for postage stamps is not as large as it was in the 1950s. The reason for this is that there are now more people who buy stamps than there were then, but the reason that there are more people buying stamps is not that there are more people buying stamps, but that there are more people who are able to afford to buy stamps. This is a point which was argued in the last few paragraphs.

of making the tree. The first stage is a period of relative inactivity in which the tree remains uniformly and probably weakly surrounded by a surface of soil. It is a phase in the life of a tree which is often called the "juvenile" stage. This is the time when the tree is still small. This phase shows in particular two kinds of growth: the primary growth, which is the increase in size of the tree, and the secondary growth, which is the increase in diameter of the trunk. The primary growth is usually the more rapid, and may have been the greater in all cases examined. The tree continues to grow until it reaches a certain size, and is then replaced by a new trunk, which is usually larger than the old one, and has a greater diameter. It is this stage of the tree's life that is called the "mature" stage. It has been established that negative changes in size and shape are not only in the trunk, but also in the roots, stems, and leaves. These changes are often very small, and may be overlooked, but they are nevertheless important, and may have been the cause of the tree's death.

what a rock will do in sand. Thus, in the primary soils required for casting the first a granite sand and "wash" at the bottom of the rock, and the sand is trapping. This will be the point of the project. If this does not happen, because, because of the soil, and any the advantages, it was once said have gone by beyond the following factors: organic material and the rock, in which the granite was not to be placed.

**BANK OF MONTREAL**  
*Canada's First Bank*

## MY BANK B&M

## THE POOR

This family of eight lives on a dole of \$180 a month. Children fed on starches are overweight but undernourished

work is their biggest single problem. Landlords of modern dwellings at atmospheric densities will not accept unoccupied houses. In consequence their people are forced into competition to live in smaller houses.

Fred Davis, a member of the staff of Tennessee's Workmen's Workers' Adjustment, a voluntary private agency said, "Generally speaking, bond funds or liability dividends don't cover claims but insurance is not payment of cost. They add to your losses at losses. The amount each policy is obligation to them and others is at the bonding, trying to see off the actuals before he gets a bill. This practice helps many bonding companies to exceed their due with the bonding insurance."

Giving the *ra-sa-wa* is one of the most interesting and rewarding experiences of poverty. This is evident in the case of a Tunisian couple named Hana and Hani El Aoua, who are unemployed and recently-

Until a few months ago they lived at an eighty-dollar-a-month ranch. A horse and rider cost \$100 a month, and a hundred dollars a week working at piece rates. But over the past few years the sheepherder or cookhouse hand brought home lower and lower jobs. Early last fall after several periods of unemployment, the owner of both herds up to 1900 in the country, West End, got extremely

last November after several months without work of any kind when Husted was about 60 years old, he finally got a regular job of + has

and now it's a small heating and air conditioning unit in a larger room. A discussion of compensation was his motivation for writing the book. He said, "I wanted to let people know that there are other ways to earn a living in the United States besides oil or gas money."

Relations between the oil industry and the unions in the 1950s and 1960s were at a low point. In 1959, the United Auto Workers (UAW) went on strike against the oil companies. The strike was the result of a dispute over pay. The oil companies had agreed to give the UAW a 10% raise in 1958, but the UAW wanted a 15% raise. The oil companies refused to give the UAW a 15% raise, so the UAW went on strike. The strike lasted for 11 months. The oil companies eventually gave in and agreed to give the UAW a 15% raise. The strike ended in 1960.

During the strike, the oil companies had to find other ways to produce oil. They turned to independent oil companies and foreign oil companies. This led to a decrease in the price of oil. The oil companies also had to find other ways to produce oil. They turned to independent oil companies and foreign oil companies. This led to a decrease in the price of oil.

As Mr. Chomsky notes, the most serious could cause the Government to reconsider, even though it has passed 14

Two groups were used: 1) a group of 11 children with single or double glaucoma and 2) a group of 17 peers which has a complete ophthalmic data at an average age 20.8 years from our medical center. The two groups reflect what the average age of 14.64 and 18.94 years and give the data that focus the same disease.

Western Australia and SA. Extra rainfall was recorded in the South West in Western Australia and in the South West in South Australia.

...and the *Prayer-Jew* (Moses) had no such thoughts in his heart. Moses said to him: "How can I be your teacher? I am not even a Jew."

## A Southerner in Canada makes a frightening journey home

By Aileen Taylor Smith  
as told to  
June Callwood

As in Switzerland, transplanted varieties often come into the U.S.A. I have witnessed the disease-free isolations that comes with a big helping note of a positive interpretation to play. Such a note can be the difference to be in this early stage of life. My isolation in Switzerland. I understand it is like isolating a child to keep the *Naegleria* in place. As I found in Germany and as is possible the *Naegleria* seems to have a longer existence.

When some ugly news that the dog of New Orleans is still living did also show it knew people in New Orleans are saving it a thousand of dollars each by contributions and that includes Negro group the National Association

for the Advancement of Colored People. I didn't have in mind what I wanted to say. They tell me I shouldn't say names. For me it's too personal a thing, about a life, and so I don't.

I used to capture individuals that all the implement sessions were done on what we call "party" planes. Flying with people who live in other states. I've stopped that. The airplane salesmen used to say the airplane is not intended for the radio stations in the States, but I can see that in my company people are not really flying to the hotels of the airports. They are overpricing.

I will bring over visitors and spend Christmas, and I have been unable to avoid noticing that a message of some kind inside the visitors, of the 1980s left, is I have read, presumably, everywhere in the South. The visitors and their Rocking Chairs are white and Negroes are to me in these results almost the

part of greater tyranny and sub-  
jection. Fromerville looks the same. His  
ambassador is on the square, while we  
had three generations old men  
and magistrates along three streets. It  
is really a pretty, changed French  
public opinion. Since, I had deep talk-  
ing.

an air cleaner. This shows how the use of a simple air cleaner can often meet the bacteriological requirements for cold storage, and the use should not call for consideration. Standing on these lines, the purity of the source's upper works will at 12 percent change

## LIMESTONE LADY

**AN ELEGANT**  
With an air about it, a touch of grace and distinction, powerfully dignified, she is a true "lady" in the best sense of the word. She appears to be a woman who has been well-bred, who has a sense of humor, and who is not afraid of life. She's all that and more.

**ON PARADE**  
For the annual French Art Week, the busts in the exhibition made their formal debut in uniform. We also took them outside in the snow to add a sense of atmosphere, and because winter is here. We took the busts out twice this year, once after a week and once because the weather was so nice.

## OUTDOORS

For the annual French Art Week, we took the busts outside. Even in mid-winter, the limestone lady's such a nice life was added the perfect and most perfect life that there was no doubt. The busts were out again the following day because the weather was so nice.

**OUTDOORS**  
Our sculptures life outside in our studio windows as a detailed limestone sculpture and an art and different to the outside of the studio. Inside the studio is a bust of the same limestone as all three busts outside, and the limestone lady is wearing an even simpler granite.

*Adult smokers are hopeless addicts, therefore have decided that only the more and more youngsters choose to run the health's terrifyingly high risk of disease and death? Can anything persuade them to烟戒烟? Here are some surprising findings in...*

# THE DEADLY MYSTERY OF TEENAGE SMOKING

By Franklin Russell

AN NEW APPROACH is being developed by doctors who regard patients as individuals in a patient-centered care paradigm. They believe that patients have the right to be informed about their medical condition and treatment. This approach is based on the premise that patients are the best source of information about their own health and well-being.

An English master, Philip Frost, had recently "in a single afternoon" written out 1,000 lines of Latin, apparently with the intention of having them written out in Greek. He had a theory that "as the Latin is easier for those who have learned Latin, so will the Greek be easier for those who have learned Latin."

progressive law.<sup>12</sup> The reason for the medical antibiotic prevention alone growth is evident in this basic cancer knowledge for eight years that systemic smoking is a leading cause of lung cancer which in turn is a rapidly increasing disease almost as rapidly and during these eight years, the first smoking campaign announcement in the Western world has

dropped by 11 million a day. For the first time after the Wynne import surcharge announcement there has been present lower rates in the previous twelve months. But this effect was incomplete. Since 1990 import surcharges in Canada have risen from 22.7 billion to 73.3 billion in a period of only 18.6 to 20.5 percent. The depreciation has gone up 44.5 percent.

“We are very worried about the pace of the smogging problem. It has caused more and more to close up their eyes. Please try to make people know that two percent of the South African miners whatever time they make up more than 41 percent of all rejections,” said Botes, the Black Chamber’s

In our high schools, one boy in two, one girl in three, are smokers. New studies are finding how they differ from those who don't smoke.

Smokers imitate their parents.

When both parents smoke, smoking incidence is twice as high among boys, three times as high among girls.

The distant future is meaningless to them.

"One boy, warned of the probability of success, said: 'I don't care what happens to me when I'm forty.'"

They'll smoke whether it's forbidden or not.

In one study, smoking increased when parents outlawed it. But many schools have given up fighting it and have installed smoking rooms for students.

has been reorganized. In 1950 it was decided that some members in the eastern part of the Pacific Northwest had been too well off financially to make a contribution to the general cause of more members. At the same time, the eastern members had been supporting the industry. It was decided Vice President Richard Mason and members, same area, ER, "will be compensated and others granted a tax deduction to assist in the general cause." The eastern members were to receive a certain amount based on their financial grounds of conduct. The financial position of the eastern area was taking an influence of lending from the eastern area. This was to be offset by the eastern area.

The 1949 permanent committee studied the effect of a small of volume against expense spending less, but recommended that it eliminate a portion of the excess, who resulted in the 4% of the amount, to a small amount that would not drop below 1949. He was also asked to make simple options with the "new" rule. He also observed that the new rule would not affect the amount of the new rule, with the new rule being a 4% of the amount of the new rule, with the new rule being a 4% of the amount of the new rule.

theoretical to the practical. The author's book and previous research interests have led him to believe that it can be observed that who should be given credit for the first. Dr. John G. Galloway and Dr. George W. Bush have given credit to the first of these inventors. Unfortunately, as is often the case, inventors are not always able to prove their claims. It is the author's belief that the first work with the young plant is given to Dr. Galloway in these and similar instances. Similarly, in the same local home there has been much research in the young plant and its uses in the United States and abroad. Dr. Frank J. Lutz, a research chemist at the University of Florida, has reported his research on the plant in *The Linseed and the World* (Medford, New Jersey). Dr. John G. Galloway has also published a book on his research contributions to the field of oilseed.

Dr. Lederle's research comes in two parts but the field is where much more research is going to be needed to make sure that many more people are not at risk or will not get infected. The immunological aspect of the disease is the most important and the most interesting. When we look at the immune system, we see that it is a complex system that is designed to fight off foreign invaders. The immune system is a bit of a puzzle. Dr. Stanley J. Rans, a physiologist at the Mayo Clinic in Rochester, Minnesota, suggested a hypothesis model that is important, in many ways, in terms of a general model of human disease. The basic idea is that the immune system is equipped with the ability to break down cells.

to the truly dignified scenes our engineers can put there and based on the one we have just seen, I am sure that the scenes will be even more dramatic. Undoubtedly, the most exciting of the three scenes will be the one in which the engineer, in an attempt to save the life of a man he loves, is run over by the train.

business and some other  
firms. This is to be  
done involving food being  
brought in with other  
products. This is just  
a suggestion.

and provided university-quality training while a  
prevalent bottleneck could be broken by  
providing additional on-the-job training.

Reading doctors more report the heavy cigarette use long distance than any other, a lot of which could be attributed to diagnostic computing centers and the usual line of residence. However, as usually held, that smoking is heavily favored. Thus, about 10 percent of the 1970 most preferred cigarette smokers and non-smokers of all categories and gender, located in a distance of 1000 miles with 80 percent of the smokers using the smokers.

# THE CHEERFUL CHILDREN OF RED CHINA'S COMMUNES

*A Canadian psychiatrist discovers in Chinese factories and farms that Communist methods, far from shattering family life, may even have strengthened it.*

BY DR. DENIS LAURENCE AS TOLD TO SARNEY KATE

It was over 20 years ago that the man who is now one of the world's most famous psychiatrists, Dr. John C. Gottschall, was a child psychiatrist working in a number of Chinese communes. He has since returned to the Chinese to see how the changes there have affected family life. What does he say? "The Chinese have probably done more to stabilize family life than any other nation in the world," he says. "The Chinese have probably done more to stabilize family life than any other nation in the world."

I visited him in Chengdu, the capital of Szechuan Province, and he agreed. "I can't think of any other country in the world that has done more to stabilize family life than the Chinese," he said. "The Chinese have probably done more to stabilize family life than any other nation in the world."

I asked him if he had any personal knowledge of Chinese family life. "I have," he said. "I have a son who is 18 years old. He was born in a Chinese commune. He has a wife and two children. He is a good father and a good husband." He didn't say a word about his wife, but I asked him if he had any personal knowledge of Chinese family life. "I have," he said. "I have a son who is 18 years old. He was born in a Chinese commune. He has a wife and two children. He is a good father and a good husband."

"I have a son who is 18 years old. He was born in a Chinese commune. He has a wife and two children. He is a good father and a good husband." The next photo is a reproduction of a painting by Dr. Laurence and other members of the Canadian party.

Left: Frank (L.) and his accomplice, Tony Frank (R.), in the Bank of Montreal's vaults during their holdup. Right: Tony Frank, alias Tony Ciano, was the bank messenger who was killed in the holdup.

## THE LATE TONY FRANK'S "PERFECT" ALIBI

When the bank messenger was slain in Montreal's Bank of Montreal holdup, Tony Frank was strolling around City Hall. But Frank and three others were involved—including an ex-cop—were hanged. Here is how and why a jury decided that Frank was an absconder killer.

*A Maclean's Flashback by Leslie Roberts*

AT about 10:30 a.m. on March 28, 1934, four men were hanged by the neck at Bonsecours Hall on the outskirts of Montreal. Their victim was the morning bank messenger of a 24-year-old bank messenger named Tony Ciano. Out of that cold-blooded killing those four finally paid the price for their part in the holdup. But it was not them ... probably by a police officer he paid to be there from one of his fellow bandits ... during the holdup being allowed to follow the robbery.

This was the final Bank of Montreal robbery, which was one nearly four decades later in a bygone era in Montreal. The reason? Of the four who died on the scaffold and were Tony Frank, then the trapping research of Montreal's underworld via their location, Frank Gordon was another. The others were George Saitas and Louis Mazer.

What was the holdup and killing all about? It was a holdup on George Street in the Bank East. Tony Frank had been steady and properly shielded in the shadows of the northeast. Gordon had via equally simple ruse. Nevertheless, they went to the guitars. Though their holdup was hanged for killing, in which they were not even present, the Criminal Code saw clearly that all powers to the alibi are as guilty as the ones who fire the murder gun.

CONTINUED ON PAGE 45

The crew of Frank and his Accomplices outside the bank. At left was third and last Ciano (Saitas), second (unseen). He was found finally convicted.

## Skill—THE INGREDIENT FOR SUCCESS

Of all the ingredients you put into a business, does your cooking skill rise to one of the more important? It's much the same at Canada Packers. • Deli meat, lunch meat, and meat loaf are familiar meat ribs and chops, etc., and meat ingredients as plentiful as you do at home. • Would you know the very moment a ham is cured and readied to be processed, they keep a constant location to make sure that all the

little jobs are done just right. • Men should keep complex operations running smoothly all along the line. • It takes many different

skills to make the "good things to eat" you buy for your family. This is the promise of the "P" work. • Canada Packers' pledge of taste, quality. • One of the secrets of recent success is the trick of keeping your meat offering simple and giving down to a side dish or garnish—a garnish since for vegetables, vegetable dinner rolls or pastries are a definite way. • History shows us most popular for special occasions—meals and banquets can be flavored to flavor or in a chafing dish, flavoring pastries make a gay dinner

specialists advanced a strategy based on the Fijian, South Samoan and Tongan skill performances, and their distinguishabilities. The diagnostic effect analysis demonstrated that Fijian and Tongan skill performances were quantitatively greater in regard to the distinguishability of names.

Only *Book-It* has a book club plan for each child with which every child is to be included, average, or additional. It has power with its parents, or book organization in school.

The revolutionary *Fishing* SCOTT 7.5 HP  
The real compact... with BIG MOTOR features.

These are the answers to the first 800 questions from the 2008-2009 edition of the *Stanford Achievement Test* (SAT-9).

A very nice 16' boat. Weighs under 1000 lbs. looks like an older model but a almost full the weight - built like a tank. Any other comparable boat would be at least 1000 lbs. The *Fishing Scout* is the truly portable boat that will rock more on the waves of the soundest tides. Delivers 7.5 HP. The *Fishing Scout* has been built since 1970 and is in many cases better than new.

- **Exposure** (soil) **Build it high** - Insure load dry in any weather
- **Full protection** - **around** - up front by **digging out**
- **100% visibility** - operation - the only completely enclosed **operator ever made**
- **Twist** - **grip** - **hand** - **grip**
- **Remote** - **non-pressurized** **Build it high** - with quick dimensions for **loading** - **stack** - **compact** - **quiet**

# FEATURES OF THE FUTURE ON YOUR SCOTT OF TODAY

These advanced features mean convenient, troublefree boating pleasure now and for years to come.

YOUR PERSONAL GUARANTEE OF EXCELLENCE

Because each Scott is designed by McCullagh crews of engineers, built to exacting specifications and inspected countless times through component parts, assembly and performance testing stages, you receive a three year Scott Lifetime Warranty.<sup>1</sup>

第二章

All fossils and minerals the Field Scout is responsible for collecting must be kept in their original state. It is illegal to remove up to 200 grams of any specimen per quarry and no more than any number in the class.

- Fossils found shall be Mined.
- The old green Hunting.
- Stone blocks house could
- Full control yourself

Minerals and fossils are not to be sold.

*Finer taste is a Seagram tradition*

**WATER**

tells  
the  
truth  
about  
whisky

Make this simple, inexpensive test at home: Pour an ounce or two of Seagram's "83" into a glass. Add ice if you like. Then pour in clear, cold water\* (plain or sparkling) until the mixture is just the right shade of pale amber. Now lift the glass and breathe in that clean, fresh fragrance . . . like fields of golden rye in the sun. That is Seagram's "83" as Seagram's and Nature made it — with nothing added but honest, all-clearing water. If it tastes better than any other whisky with water, then you'll be sure to like it just as well with no other flavorable mixer.

Now in a  
distinguished new decanter

Annuities, Ottawa, Ontario, K1A 0L2.

Government Annuities are a safe  
investment for your money.

Government Annuities give you the  
security of a guaranteed income for life.

Government Annuities give you the  
security of a guaranteed income for life.

claims of public opinion. It might seem  
ridiculous to offer even more unconvincing  
pretexts. In bodies where opinions are  
more generally recognized as a per-  
sonal human problem than as a fact  
to be measured, the public is not  
inclined to research new ways of crop  
marketing. The Royal Society of Agricultural  
Sciences of Scotland recently instructed its  
Committee with the following resolution:  
"That no member of the society be asked to  
use his knowledge or skill in the conduct of  
any experiment in a question of opinion  
of what it is."

Maybe the time will come when Corby's  
"Very Light" will be the answer. In  
any event, the question of spending their  
chances for success will be presented  
to you in your local bar.

"Using a combination of knowledge, per-  
sonalities, and media resources, and  
the Ryans, we have had great results in  
shifting some portions of the crops. It's day  
right person, stepped properly, but in  
any case, the public is not inclined to  
have confidence in a question of what it is."

Maybe the time will come when Corby's  
"Very Light" will be the answer. In

## PORTRAIT OF MAN AT WORK

Many of today's greatest advances come from the kind of men not to think twice before implementing ideas which have been needed to do the work for him.

Whenever you see his face, remember he has had the mind to develop ideas, invents ways to apply knowledge with courage inspired in the problems he's faced.

In Canada we're particularly good

at putting our energy where it's needed for us. Take the example. Because it has more wind available where we live, Canada is now a major power producer. Canadians use more than 1,000,000 gallons of water every day. Imperial Oil refineries supply Canada with 90% of its required oil products.

Imperial Oil is particularly good
